

**Advance International Media has worked with Onsite Connect since November 2015. They gave us really helpful advice and worked tirelessly on the installation of our phones and the corresponding software in our new premises in December 2015. The office move was flawless and there was no disruption to our telephone or broadband services.**

**Throughout 2016, the level of support has been superb and they always respond quickly and efficiently to our requests and problems. We would not hesitate in recommending Onsite Connect and, as our business expands, we shall continue to use them in the future. We will need their expert advice for a telephone upgrade and will be requiring their support during another possible office move in 2017.**
