

1st July 2016

Please accept this letter as my personal recommendation for On-Site Connect Services.

Bryburn Developments was set up in 2014, and required a full set up package from telephone systems, mobiles for our Contracts Managers on site and workstations for the office.

The level of service received from Kerry and her team, has been excellent. Nothing is ever too much trouble and any technical issues are dealt with promptly and efficiently. They continue to support us, as our business grows and ensure that all the tools required by both office staff, and contractors on site are supported on a daily basis.

Bryburn Developments
